

## Message to Residents of Bank of Victoria

Washington, DC, USA, May 12, 2009

Dear brothers and purpose of dreams!

That the peace of our Creator is on their fields and that divine justice never miss from its streets and air. It is with great pleasure that I turn to my brothers of the community of Victoria Bank of the Rio Cachoeira, which never was, but I was like who is born and lived in the shadows of its cocoa and have drank the water for long days of the famous Bica Good Water. So, in my tropical dreams, I am walking in their paths green and warm, talking to my people, eating their delicious fruits and seeing the real landscape of paradise.

I, like you all that harmonious community, I have dreams and do everything possible to tell whether ethical and human to achieve them. When these dreams are bigger than my abilities and strengths, I seek help from my brothers and then the miracles happen. We all always together the best of dreams is to help our brothers.

I believe that Bank of Victoria is very different from our stunning surroundings of Chicago, but still, I feel like and who takes the hand of an old and beloved friend, that our people is common and has the same origin in Africa of all us. We are therefore equal in our DNA's, dreams and prospects.

I tell you all how to speak to my beloved son: Do not give up their dreams. Not accept that no one - not to be yourself, determine the limit of its capabilities. Never accept a no for a purpose. Never discredit in his power to overcome. Lute, - not with weapons - but with ideas and proposals for the construction of a community always better. Acting thus, you achieve success.

I know you all are children born to overcome and warriors of the time. However, not as I accept the adversity of their destinations. Not delegate to anyone to write their own history. Dream, believe and strives for its ambitions. Acting so, one day, the Heavenly Father put on his Colos, their goals as we dream.

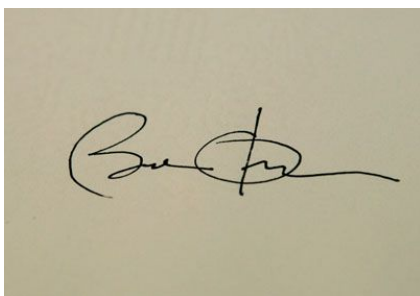

Remember always that you are unique and irreplaceable. But never forget that we are all equal in respect of the common good of humanity. Thus, you can be sure that each of us has a special role in the Planet Earth.

Finally, dear brothers of Bank of Victoria, just be honest with our dreams and worthy of our aspirations. Always do good and do well in the happy and prosperous.

You permeate my most intimate and longing are characters of my daily prayers. I promise that one day I will still walk on its streets and today I feel like a child around the house that their parents loved.

That the Lord Jesus Christ is always protecting you all. The sun to rise every day on your beautiful horizons, governing their fields with beautiful possibilities, great achievements and constant perseverance.

A strong and warm embrace of his brother of faith, dreams and struggles.
